do test in different modes.

I think, US-weapons will not be tested under CIP, but under SAAMI specifications. So they will not have a „CIP-Beschusszeichen“; tick the „no“-box. If you have a SAAMI-Proof document or something comparable, you put this in addition to the form (section 7, Anlagen =„additional paper“)

„Kategorie"

for a Ruger 10/22 semi-auto 22LR rifle >>> B, 2.4

If the weapon has a red dot sight and/or compensator, it makes no difference.
